Reedco Posture Score Sheet

- Population:** Adult population
- Description:** The Reedco Posture Score Sheet was designed to be an easy to administer tool for diagnosing a patient with poor posture.
- Mode of Administration:** The Reedco Posture Score Sheet is a task performance exam.
- Completion:**
- Time to Complete:* 10 minutes
- Time to Score:* The time to score is included in the time to complete.
- Scoring:* The patient is observed standing in several predetermined positions and is scored based on their posture.
- The patient is rated based on the four posture conditions, forward head, dorsal kyphosis, trunk inclination, and lumbar lordosis. The conditions are scored on a scale from 0 to 10 with 0 being poor and 10 good. (See score sheet for more information.)
- Interpretation:** See score sheet for interpretation.
- Reliability:** Inter-rater reliability was tested in a study of 202 subjects for the four variables of forward head, dorsal kyphosis, trunk inclination, and lumbar lordosis. Three physical therapists tested the patients and then alpha coefficients were calculated. The alpha coefficient had a range of 0.899 to 0.915 indicating a very good level of interrater reliability.
- Validity:** not reported
- Reference:** Lewis CB. 1983. The Relationship Between Posture and Psychological Variables in Students Age 18-25. *Oregon Free Press*.
